V.	Typography	6
VI.	Trademark & Usage	8

Primary Logo

The logo is used both in horizontal and vertical lockups depending on the available space. In order to preserve accessibility, the color version must be used in white backgrounds and the opposite.

Logo

Logo vertical

Safe Space

The "double i" refers to the safe area around the logo, which must never be encroached upon by other visual elements or text. It also ensures that the logo is never placed too close to the edge of a document.

File Type Icon

The file type icon can be used in sizes as small as 16×16px. Its usage is limited to AsciiDoc file representations and should not replace the primary AsciiDoc logo.

File Type icon.

Brand & UI Colors

These are the colors that will mostly be used to represent AsciiDoc brand identity. However, for accessibility and readability reasons, there's the extended Color Palette of 10 different shades. When colors are used in text, according to Web Content Accessibility Guidelines (WCAG) 2, Level AA requires the contrast ratio to be at least 4.5:1. Any color of the palette can be used if this requirement is met.
