- Hendrik Ebbers (Karakun) (20 min late)

Other Attendees

- Simon Ritter (Azul)
- Shelley Lambert (Red Hat)
- Lan Xia (IBM)
- Jan Westerkamp (iJUG)

Eclipse Foundation

- Sharon Corbett
- Paul Buck
- Mike Milinkovich

Minutes

Approval of minutes from July 22, 2021 meeting

- Approved by EF

Approval of minutes from August 12, 2021 meeting

- Approved

- EMO has understood that JDK17 does **not** require a new OCTLA agreement.
- Tim did request a Tweet announcing release (has gone out).

Informational Update on Temurin Release

- <https://github.com/adoptium/adoptium/issues/68> - to track progress publicly
- 2 JRE's have been released on JDK8
- More secondary platforms are now out the door.
- The delay is primarily due to the lack of people available to run the tests.
 - New committers on the way!
- Samir asked if the coffee cup logo could be used when an application is bundled with a Temurin binary.
 - Third parties cannot use the coffee cup logo without a direct agreement with Oracle.
 - Third parties can use the Java Duke as it's under an open source license.
- Docker Hub images are available as well as homebrew casks.
- JRE's for 8 will be produced. Maybe for 11 and definitely not for JDK16+
 - Recommend jlink instead

Presentation from marketing sub-committee

- The Temurin logo is now available in Google drive.
- The committee has produced some mock-ups to demonstrate the marketplace and documentation pages.
- Working on the challenge of clarifying the difference between Adoptium and Eclipse Temurin. (Likened to Corretto and Amazon or Azul and Zulu)
 - We need to write down a clear breakdown of naming.
 - Suggested that the Marketing Sub-Committee discuss this in the next meeting.

Adoptium Marketplace Policy Review

- Not ready for voting yet - informational update only at this stage.
