Eclipse Fdn	<input type="checkbox"/> Juan Rico	

Minutes:

Approval of minutes from November 23rd, 2023 meeting

This meeting was not quorate - approvals deferred to a later meeting.

No formal business to be undertaken at this meeting, but agenda items will be discussed for awareness.

ARM32 support in Temurin 21 (potential program plan variance)

Little desire to support it - JDK21 seems like a good time to break the support

AoB:

Jan: Project for Remote sensing of data using libraries developed by Sun but not maintained by Oracle. May or may not have been in older Java SE releases. There are some maven artifacts deployed with them but they cannot be rebuilt. Would EF be willing to take that on (likely with a namespace change like Jakarta, if something is modified)

Simon: ImageIO is using an internal API, not a public one. JAI (successor) is using a public API.

Java Advanced Imaging (JAI) vs ImageIO

Maven team say java21 will be last version that will compile SE8 bytecode
