- ☐ Martijn Verburg (Microsoft)
- ☑ Jan Westerkamp (iJUG)
- ☐ Hendrik Ebbers (iJUG)

Eclipse Foundation

☑ Paul Buck

☐ Sharon Corbett

☐ Mike Milinkovich

Minutes:

Approval of minutes from July 28th 2022 meeting
- Approved

Temurin Hardware loaner program update
- Still waiting on legal approval before sharing with the working group

Displaying a warning on old marketplace entries ([issue](#))
- Tim has prepared a patch for the website which will mark potentially out of date binaries in the Marketplace.
    - If binaries are >180 days old then the binary is considered out of date (missed 2 quarterly security updates)
    - Checking that WG members are happy with this policy.
- No objections so proceed with the integration

OpenJDK 8 and OpenJDK 11 community reference builds moving to Adoptium ([external issue](#)) and [Docker implications](#)
- Red Hat plans to deprecate the "Upstream" reference implementation builds that are published at AdoptOpenJDK. Deprecated users are encouraged to migrate to Temurin.
    - These builds are the base for the "OpenJDK" official docker images.
- Plan is to discuss the deprecation plan with the Docker hub folks.
    - With 1B+ pulls the image is heavily used and could break millions of users.

Marketing material budget, in time for EclipseCon
- Request to working group for Eclipse Con marketing budget
    - No concerns at this stage - marketing committee to put a wish list together

Wordmark and logo for Adoptium are both fully registered in the US
