Minutes:

Approval of minutes from November 23rd, 2023 meeting

The meeting was not quorate - approvals deferred to a later meeting.
No formal business to be undertaken at this meeting, but agenda items will be discussed for awareness.

ARM32 support in Temurin 21 (potential program plan variance)

Not shipped Temurin 20 or 21 support on ARM32 due to test failures.
Checked with OpenJDK whether this is a maintained platform (thread), it is clear this is not a priority upstream with ad hoc patches being applied.
Call for any interest in this platform to be disclosed as effort to release on Temurin will follow reduction as evidenced in OpenJDK.

Equinix x64 system sponsorship removal

Three fairly large machines provided by Equinix x64 LInux/Alpine Linux and Solaris x64 are being withdrawn at the request of Equinix. Plan to decommission them in 1Q2024.
Will need a plan to move onto an alternate cloud provider. Looking for support from working group cloud providers to cover the shortfall.
