BIRT API Change Control Document

This is a document to track the change request to the BIRT API. For each change request, the document will describe the new requirement, proposed solution and follow-up actions.

1.   Introduction

To support 'projectFolder' feature and do some refactor about the 'resourceFolder' in SessionHandle and ModuleHandle.

2.   Changed APIs:

N.A.

3.   Added APIs:

3.1   Name = getResourceFolder, setResourceFolder

Component name = SessionHandle

Package name = org.eclipse.report.model.api

Change Request:

Adds two methods

```
/**
 * Sets the resource folder for this session.
 *
 * @param resourceFolder
```

```
 *              the folder to set
 */

public void setResourceFolder( String resourceFolder );

/**
 * Gets the resource folder set in this session.
 * @return the resource folder set in this session
 */

public String getResourceFolder( ) ;
```

Proposed Solution:

These two methods will be added to operate the 'resourceFolder' in the session. They are changeable with the session, not static.

4. Removed APIs:

N.A.

5. Miscellaneous Change Requests

N.A.
