BIRT API Change Control Document

1. Introduction

Add new API Platform.setOSGiConfig() and Platform.getOSGiConfig which can be used to set and get the configuration of the OSGi platform.

2. Changed APIs:

None.

3. Added APIs:

3.1 Name : PlatformConfig

Component name : org.eclipse.birt.core

Package name : org.eclipse.birt.core.framework

Change Request:

1. Add method:

   void setOSGiConfig(Map)

   set the OSGi configuration used by the OSGi framework

   includes all valid osgi config except:

   a) osgi.install.area, always using the one defined by BIRT_HOME

   b) eclipse.ignoreApp, always be true

   c) osgi.noShutDown, always be true

   d) osgi.framework, always using the one defined by BIRT_HOME

   e) osgi.framework.useSystemProperties, always be false

2. Add method:

   Map getOSGiConfig()

   get the OSGi configuration used by the OSGi framework

Proposed Solution:

According resolving bug 159445

4.   Removed APIs:

None

5.   Miscellaneous Change Requests

None.
