Cloud Development Tools Steering Committee Calls

Agenda & Notes

2020-02-20

Discussion Topic	Moderator	Min
Approval of minutes from February 23	Martha	5
Marketing update: logo, website	Sharon/Paul B	5
Technical priorities: community engagement	Paul B	40

Attendees

1. Paul Buck, Eclipse Foundation
2. Martha Benitez, Red Hat
3. Mario Loriedo, Red Hat
4. Tamir Menahem, SAP
5. Venkatauday Balabhadrapatruni, Broadcom
6. John Duimovich, IBM
7. Paul White, Eclipse Foundation
8. Sharon Corbett, Eclipse Foundation

Past Action Items

- All: continue work with their companies to get approval of the participation fees recommendation for 2020
- All: Send along ideas for the achievements we'd like to see from the WG coming out of 2020
- ~~Paul will connect Sven with someone to determine the location to publish the marketplace~~
  - ~~Paul B followed up with Sven after the call to get an outline of the proposal for the Open VSX Registry & Marketplace. He is now starting to explore the proposal to at some point after it is stood up to transfer it into the Foundation.~~
- ~~Paul W: forward Tim's feedback on logo to Christie~~
- ~~Join the Cloud Tools Slack workspace~~ ~~https://join.slack.com/t/ecd_tools_wg/shared_invite/enQtODE4OTcyMjgxNDYyLWFjOTk1ODQ 0YzZlOTAxNTc1NTA5ZmQxNzdlYWJlZTc4NDE1MjNlMzc5NGNmYzMyMTBkODEyM2U2ZjdkY zI5OWI~~

Action Items from this Meeting

- ~~Martha: ensure LSP slides are in the drive. DONE, updated odt file to pdf~~
- ~~Paul B: share a template to use for the technical priorities introduction~~
  - See slides 6, 7, 8, 9 and 10 added to the Technical Priorities deck.
- Action: schedule a roadmap conversation for an upcoming call

Notes

- Approval of minutes from Feb 6
  - Unanimously approved
- Marketing update
  - Cristie from EF did another take on the logo, provided 2 options: different color fonts [grey vs purple, purple was prefered] & different wording [development tools vs dev tools, dev tools worked best]. Still some concern about moving forward with this option, but agreement to proceed with the proposed logo option rollout
  - There will be an announcement about final logo to the group before start using it in social media [email by Thabang 2020-02-20]
  - With the logo chosen, there are conversations to start a website for the ECD WG as soon as possible to at the very least showcase the member organizations.
- Technical priorities: community engagement
  - Idea:
    - For each initiative define [in 2 slides]: what the initiative is, what are the expected results, expected time frame for actions identified
    - Present the basic slides at next ECD Steering Committee call [March 5th], discuss / agree each proposal
    - Schedule an ECD community update call to introduce the priorities and initial plans to the wider WG audience
    - Get interested parties working together in subgroups [one for each technical priority]
    - Plan periodic updates from the subgroups' progress
  - Volunteers to prepare slides for the next call:
    - Standard developer Workspace definition [Tamir]
    - Extension library / registry [Sven]
    - IDE extensions for serverless and functions-as-a-service [TBD - Red Hat]
    - Extensions to LSP, DAP, and establishing a tracing protocol [Mickael]
    - Running developer tools in containers (overlaps with Tekton / pipelines) [Tim]
  - Questions:
    - Venkat: is there a plan to have LTS releases [for Che]?
    - Paul W: the steering committee can decide to provide this [for any of the projects in the ECD WG]
    - Paul B: Should LTS be priority #6? More like a 'requirement' for mature projects in the group
      - The ECD WG Charter mentions the responsibility of the Steering Committee to "Define and manage the technical roadmap" of the group. Action: schedule time in an upcoming call to start discussing the milestones for this
- Other topics?
  - N/A
- Next meeting scheduled for Thursday, March 5 at 11:00 EST
