

Hans-Ake Gustafsson

Project Manager, SW Tools

STMicroelectronics Software AB

Hans-Ake Gustafsson has 35 years of professional work life experience as an embedded software, PC-application and software tools developer and as a project manager covering automotive, aerospace, and general purpose applications.

Hans has participated in software standardisation efforts and the development of domain specific modelling and development tools in close cooperation with semiconductor vendors.

Additionally, he has a long experience of developing embedded software development tools, working with strategic open source investments, coordination with partner vendors in the embedded area and a long involvement in the Eclipse ecosystem itself.

Hans looks forward to the opportunity of representing STMicroelectronics and all participant members at the Steering Committee level.
