RESOLVED, the Steering Committee unanimously approved the Minutes of June 25, 2024.

Motion: Approve Minutes of July 11, 2024. Mark moves and Martin seconds. No objection to unanimous approval.

Minutes for July 23th, 2024

Regular Steering Committee Update (Thomas):

- Results of the survey of the on-site meeting: people were very happy with the organization. Earlier announcement requested. We will try to get more people from the community next time. Make hybrid participation possible?

- Started updating the Eclipse IDE Pitch Deck: thanks to Titouan. More Review requested. Also IDE Presentation of EF Ecosystem Team: Before we review it, we need to update the

slides once the actions from on-site took place (3 sentences, long-term vision, objectives).

- New members pipeline: strategy under improvement because sometimes much energy is needed until results are achieved. One very good meeting after on-site. The contact prepares an EXE presentation.

- Request to support Loongarch from Loongson (Chinese microprocessor company). Discussion on Member Funded Initiative Program. Should we support Windows on ARM before? Ed: SDK for Windows on ARM should pretty much done.

Dev Funding effort update (Thomas):

- Olivier and Hannes will share their progress in planning council and they will use the gitlab community board

- Work on GTK 4 Linux Hello World should start soon

- Semantic highlighting in JDT is **no candidate**

Follow-up of on-site meeting actions (Mark):

- Martin: we discussed that pieces were missing and should be updated. Charter looks more like a legal document. Companies interested in different things: Java IDE, IDE platform and RCP. First proposal for three basic sentences. I will briefly present and ask questions. Deep discussion and comments asynchronously.

- Martin moved **proposal** to our Google Docs drive.

- Thomas: started proposals for SIGs: Java LSP, IDE platform modernization, RCP

- Thomas starts to work with John Kellerman and Clark Roundy on cross-WG "toolchains digital transformation" Interest Group (IG)

- Thomas **needs support** to craft a first draft for Java SIG

- Thomas coordinates the marketing actions with Holger Voorman (who is doing the release videos) and Alshama M S (IBM), who is writing a blog posts (e.g.

- BOF at OCX: Mark will continue discussion. We do not know the options yet.

Planning Council update:

- Ed proposed Heiko for Planning Council Chair

- Mark states he thinks it would be great to have someone from the member companies as PC Chair.

- Jonah: PC Chair makes sure things happen. Probably several people from member companies suited for this.

- Martin thanked Jonah for the **terrific job** he did as PC chair!

AOB:

- Yannic: [#2114](#) for modern light and dark theme is created and discussion started, **feedback welcome**

- Everybody **aware** that Tony McCrary could be contacted for Initiative 31?
