Scrum Plug-in (EPF) Status Call - 11 Oct 2007

Attendees: Lyndon, Ricardo, Ana, Ken Clyne

Agenda

1. Establish a release plan and goal for the plug-in.
2. Prioritize the bug list
3. Take on work for the next week.

Notes:

EPF Release or Roadmap:

- Nothing decided yet for OpenUP or the tool.
- Tooling people will be establishing regular meetings going forward.

Plan for Scrum Plug-in:

- A version that can get people started with Scrum without a lot of links and make it extensible - need something that is more than a PowerPoint slide.
- Maybe provide a delivery process that acts as a cookbook on what people need to do to conform to the Scrum process.
- Want a stable English version before developing a Portuguese version.
- Maybe provide some content and guidelines in interactive games and sessions that can help teams get a better handle on Scrum practices.
- When content matures, approach the Scrum community again to get their feedback and hopefully endorsement of the content.

Contributing to content:

- Add a link to the notes on how to contribute and register for a Bugzilla account.
  - https://bugs.eclipse.org/bugs/ - Eclipse Bugzilla Site
  - Register for account here
  - People can review the bug list and claim any bugs that they want to work on.

Meeting Flow:

- During status meeting, we will review new bugs to ensure that priority and severity are correct.
- We will review what we did since the last meeting.
- We will decide on what needs to be addressed for the next week

New Priorities:

- There are guidelines that describe what priorities and severity should be used for EPF related bugs. This can be found here: http://www.eclipse.org/epf/process/change_request_faq.php

[176503](#) - P1 normal

[185390](#) - leave as P3

[186145](#) - p1 normal

[200409](#) - p3 - has to be accomplished in this release.

[202364](#) - Close since this is a dupe of 176503

[202365](#) - P2

[202366](#) - P3 (needs to improve before release).

[202367](#) - P3

[202368](#) - P2

[202369](#) - P3 - needs to be a concept since it provides guidance.

[202370](#) - P3 Normal

[202371](#) - P2 Major

[204299](#) - P1 - Major

Current Focus & Commitments:

- **Plug-in Introduction:** Ana, Ken, Lyndon & Ricardo will be working on [176503](#) since we feel that getting an improved Introduction and landing page will help with the adoption of the plug-in.

    - Lyndon will start a Google Page to start collaboration on the Introduction content (*due 15 Oct 2007*).
    - Lyndon will organize a call early next week to start fleshing out the content for the introduction.
- **Initial Scope & Vision for Plug-in:** As we continue to flesh out issues and prioritize work, the bug [186145](#) will get resolved and eventually closed out. For now, this is a work in progress.
