- No API changes from EMF Query 1.2.0.
- No End of life issues.
- No IP clearance and license issues.

Features and Non-Code Aspects

- Features
 - No new features.
 - Several small code changes for dependency compatibility
- Non-Code Aspects
 - No significant additions to EMF Query.

APIs

- No API removal or deprecation in EMF Query 1.3.0.
- EMF Query continues to have:
 - No “provisional” APIs.
 - All non-API code in “internal” packages.
 - No ‘discouraged access’ warnings (internal usage).
 - Complete JavaDoc.

Architectural Issues, Usability, End-of-Life

- Architectural Issues
 - Core architecture is stable; no changes here.
- Tool Usability Issues
 - None.
- End-of-Life Issues
 - None

Bugzilla

- As of May 27, 2009 (since the end of the Ganymede release):

		Status	
	RESOLVED	Total	
Severity	major	1	1
	normal	1	1
	Total	2	2

Standards and UI Usability

- Standards
 - EMF Query continues to provide support for expressions specified using OCL™ (via the MDT OCL component)
- UI Usability
 - No UI changes from the previous release.

Schedule

- Followed the Galileo release schedule as a +1 component:
 - http://wiki.eclipse.org/index.php/Galileo_Simultaneous_Release

Community

- Steady interaction in Bugzilla and on newsgroup.
- Continued collaboration with GMF project and other clients.

IP Log and IP Issues

- No IP Issues.
- About files and license files are complete and correct.
- Project log complete and up to date.
- The EMF project IP log is located at
<http://www.eclipse.org/modeling/emf/eclipse-project-ip-log.csv>
