Minutes 3/26/2024

Minutes approval:

- Hans: Requests for minutes approval of Feb 27.
 - No objections.

Growth and Storage Requirements

- John Kellerman: We are using more and more storage. John presents a breakdown of storage usage. Most of the storage is consumed by a relatively low number of extensions, which have lots of versions. Microsoft only reveals 5 versions per extension. But, despite displaying just 5 in UI, in practice it retains every version. The fact was proved by a certain command.
- John Kellerman: Simplest solution is to keep up with the current strategy, storage consumption will grow though. We'll have to get a 2-nd storage service or migrate, that requires a working plan.
- Kostiantyn Kirenko: Maybe MS uses slower storage for some versions.
- John Kellerman: I made a couple of experiments, downloading a recently dated extension, and the one from 2020. The difference was like a couple of seconds, this requires additional investigation.
- Kostiantyn Kirenko: We should first think how to keep all extensions, maybe we find a way (i.e. cheaper, slower storage).

Trends

- John Kellerman: Presents the trends report; Summary: Good availability achieved.
- John Kellerman: Reports top publisher, downloads, total published extensions graphs.
- Kostiantyn Kirenko: Appreciated the report, increased uptime is good. It looks like something was done with Elastic to improve the search uptime. Search was the main point of instability, it's good if it's resolved.

EclipseSource Update

- Kostiantyn Kirenko: A certain ticket is closed that should affect Elastic Search and results of monitoring. There are documentation improvements, code improvements, some PRs are merged. Monitoring is the next major goal, adding Grafana is on its way. Now thinking about load stress tests. Smoak tests were delivered, they are green now.
- John Kellerman asked for more technical contributions.
- John Kellerman: Discusses with Jacob whether the invitations are received..
- John Kellerman: Introduces Thomas Froment from Eclipse Foundation IDE working group.
