Eclipse Corner Articles

Build and Test Automation for Plug-ins and Features
 Markus Barchfeld (Zuehlke Engineering) May 29, 2005

Eclipse offers the possibility to build plug-ins automatically outside the Eclipse IDE, which is called "headless build". Eclipse itself is built headless and since Eclipse is an assembly of plug-ins, this feature is also available for any other plug-in. Although the set up of automatic building and testing requires only a couple of files, it can be tedious work to do nonetheless.... [more>](#)

Using OpenGL with SWT
 Bo Majewski (Cisco) April 15, 2005

OpenGL is a vendor-neutral, multi-platform standard for creating high-performance 2D and 3D graphics. Hardware and software implementations exist on various operating systems, including Windows, Linux and MacOS. OpenGL may be used to render simple 2D charts or complex... [more>](#)
