

## **Dan Noal**

Director, Product Management,  
Red Hat In-Vehicle Operating System  
Red Hat

Dan Noal has 30+ years as a software professional, specializing in embedded software, development and architecture.

Dan is currently Director of Product Management for the Red Hat In Vehicle OS program, having held product management roles at Wind River and AWS IoT prior to joining Red Hat. Throughout his career, Dan has held various roles in development, engineering management, solution architecture and product management covering automotive, IoT and general purpose device segments.

Dan has participated in standards bodies and SW consortia and has been active in LiMo, the Open Handset Alliance and GENIVI. Dan looks forward to the opportunity of representing Red Hat and all participant members in the SDV Working Group.
