# Eclipse Tangle EE Working Group Steering Committee Minutes
# April 23, 2021

## Attendees

**Attendees Present**
Navin Ramachandran, IOTA (Chair)
Christoph Strnadl, Software AG
Philippe Calvez, ENGIE
Sharon Corbett, Eclipse Foundation
Gael Blondelle, Eclipse Foundation
Laura Kajtazi, IOTA

**Attendees Absent**
N/A

## Minutes

**Minutes of April 9th, 2021**
- Resolved, the Steering Committee approved the April 9th, 2021, Minutes

**Vaccine & Disposable Identities Initiative**
- Progress ongoing
- It could be noticed that in some cases there might be centralized solutions.
- IF team will bring participants together in order to develop the project
- Gael catches up with Jelle; IOTA Identity is core technology, but more important is to create some use cases
- Some governments are not yet focusing on DLT solutions, as they believe the technology is not fully mature yet so they can build on it
- On the one hand trying to be more entrepreneurial is actually important as it could help us build new and innovative infrastructure in the future.
  On the other hand, the current focus of some governments provides more time to build a decentralized solution over time, rather than being in a hurry to do so

**Projects in Energy**
- Initiating and embedding on potential hardware that the ENGIE team introduced for PoC
- Interesting to use DID in this case
- Direct interaction with DLT
- Promote projects that enhance interoperability
- Use case: Using the tangle for the maintenance of a building
- Contact Holger for input on the use case
