

EGit and JGit 3.4 Release Review

Shawn Pearce (sop@google.com)
Matthias Sohn (matthias.sohn@sap.com)

About

EGit is an Eclipse Team provider for Git. Git is a distributed SCM, which means every developer has a full copy of all history of every revision of the code, making queries against the history very fast and versatile. The EGit project is implementing Eclipse tooling for the JGit Java implementation of Git.

JGit is an EDL (BSD) licensed, lightweight, pure Java library implementing Git.

Introduction

EGit and JGit are Technology sub projects.

- <http://eclipse.org/egit>
- <http://eclipse.org/jgit>

This release is the 19th release for both projects at Eclipse.org, and the goal is to foster the Eclipse community around Git.

Committer Diversity

There are many individuals and companies involved with EGit (20 committers) and JGit (13 committers)

Ageto, CollabNet, Dewire, GitHub, Google, IBM, Obeo, Twitter, SAP, Tasktop

JGit Features

Features

- Improved layout of branches in the commit graph
- Allow to include untracked files in stash operations.
- Support for SPNEGO HTTP authentication
- Added API to permit the setting of additional HTTP headers
- ArchiveCommand now supports selecting one or more paths.
- CherryPickCommand now supports option "--mainline" to pick merges
- ListBranchCommand now supports option "--contains"

Command line

- New Gerrit "[repo](#)" command
- Checkout command now supports "-- <path>" parameter
- Branch command now supports option "--contains"
- Clone command now supports option "--no-checkout"

Many bug fixes

Complete list of improvements in [New and Noteworthy](#)

Egit Features

Features

- Add ability to edit a commit directly from the history view.
- Add ability to reword a commit directly from the history view.
- Enable creating a new git repository in a non-empty folder
- Honor "branch.<name>.mergeoptions" to set merge defaults
- Add a flag in the create stash dialog to allow including untracked changes in a stash
- Enable staging view for submodule repositories
- Add compare mode to CompareTreeView
- Provide extensibility for suggesting branch names

Usability Improvements

- Fix Package Explorer text colors on dark theme
- Provide an option to fetch from Gerrit without checking out the branch
- Action buttons in interactive rebase view toggle
- Double click on commit in interactive rebase view opens commit viewer
- Allow to move multiple commits simultaneously in interactive rebase view
- Provide "Show in History" in toolbar of commit viewer

Egit Features

Usability Improvements - continued

- Show first line of commit message in editor tooltip of commit viewer
- Store the commit message edited in staging view on Eclipse shutdown
- Allow to disable logical model from preferences
- Use more space-efficient labels on commits with multiple tags in history view
- Warn when switching branches and a launch is running for the repo
- Offer to reset to a reflog entry via the context menu in reflog view
- Enable "Push to Upstream" when default remote has push spec
- Pre-fill branch name of upstream config if available in "Push Branch" dialog
- "Open workspace version" from context menu of the compare editor
- Check for uncommitted changes before pull and rewording/squashing commits
- Don't ask for merge mode per default when opening merge tool

Bugzilla (as of 2013-06-02)

- JGit

- 110 bugs open, 63 enhancements
- 22 bugs & 2 enhancement fixed since last release

- EGit

- 597 bugs open, 274 enhancements
- 72 bugs & 14 enhancement fixed since last release

Committers - JGit
