Roadmap Process

- Project Plans from projects, due September 30th

  - 15 projects have valid XML format plans that include future milestones

  - 33 projects have valid XML format plans with no future milestones

  - 7 projects have valid XML format plans with no milestones at all

  - 4 projects have plans in other formats

  - 63 projects have no plan or do not provide a pointer to their plan in the metadata

- Following step: PMCs to review plans, due October 31st

•New and Noteworthy: Projects

- New Director of Committer Community up and running
- Athena Common Builder being used by multiple projects
  - Relatively small number, but growing
  - Athena makes building Eclipse bundles/update sites much easier than PDE Build alone
- Small change in IP Log review process
  - EMO now reviews project's milestone downloads to ensure that contents of downloads reflects contents of IP Log
- Started "New Committer Handbook"
  - Resource describing responsibilities for new committers
