INTRODUCING THE NOKIA NSERIES

The Nokia Nseries range of next-generation multimedia devices offers new visions of digital media and mobility - in photos, e-mail, music, Web browsing, mobile TV, and much more.

[MORE INFO](#)

Nseries Devices

The Nokia N9C device takes photos to a new level. The Nokia N91 phone is optimized for music. The Nokia N70 device is the smallest Series 60 Platform WCDMA phone with a 2-megapixel camera.

Multimedia Overview

The business cases stronger than ever for developing multimedia applications on the Series 60 Platform, which offers powerful opportunities for branding, marketing, and application verification.

Preminet Client

The Preminet Client application for the Nokia N70 phone lets users easily purchase applications and content. It seamlessly integrates content discovery, trial, download, purchase, and updates.

EMF3

The original text said, "HUBs." If that was meant as an acronym, you should spell it out.

Also, I was unable to get "into" the center of the target to change

Tools and SDKs to: Tools And SDKs

and

Develop/optimize programming approach to: Develop And Optimize Programming Approach

Elyse Friedman, 16/02/2005

Our agenda and expectations in Eclipse

- Drive mobility within Eclipse – contribute, get people interested and working on the projects
- Lead *Mobile Tools for Java* project, contribute to several others like CDT, VE, EMF, RCP
- Get people to develop for mobile using Eclipse based products

- Deliver more uniform and competitive Nokia tools portfolio
- Allow developers to further enhance and expand our offering using other Eclipse plugins and products
- Drive the efficiency of Nokia's product creation by using open source

Thank You
