

Eclipse Europe Members Meeting November 17, 2008

Mike Milinkovich
Executive Director
mike@eclipse.org

MEMBERSHIP UPDATE

The Members of Eclipse

- 190 members
 - 22 Strategic Members
- 932 committers, representing 75+ organizations

Strategic Members

Welcome to New Members Since June, 2008

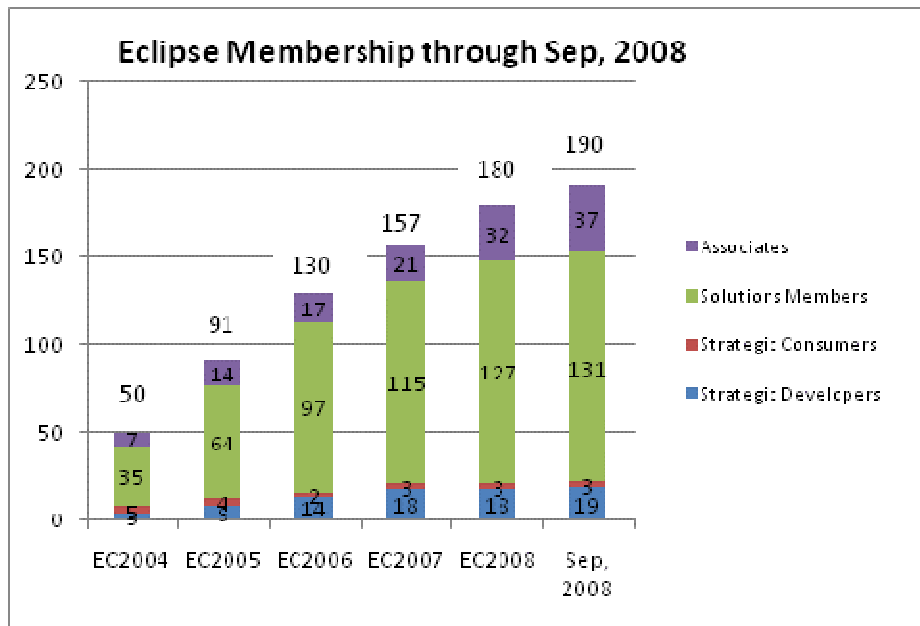

- Strategic Developers
 - Genuitec

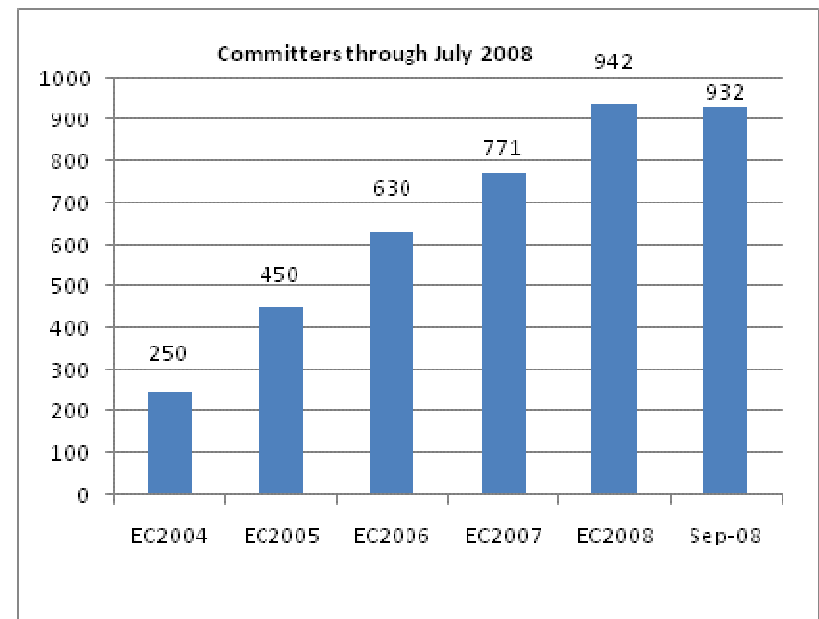

- Associate Members
 - DFKI
 - OSGi Alliance
 - CEA List

- Solutions Members
 - Netfective
 - NEUXO
 - Soyatec
 - instincttools GmbH
 - Bluenog
 - Spirit Link Technology
 - Atmel

Eclipse Momentum

Members

Committers

of members and committers as of EclipseCon each year.

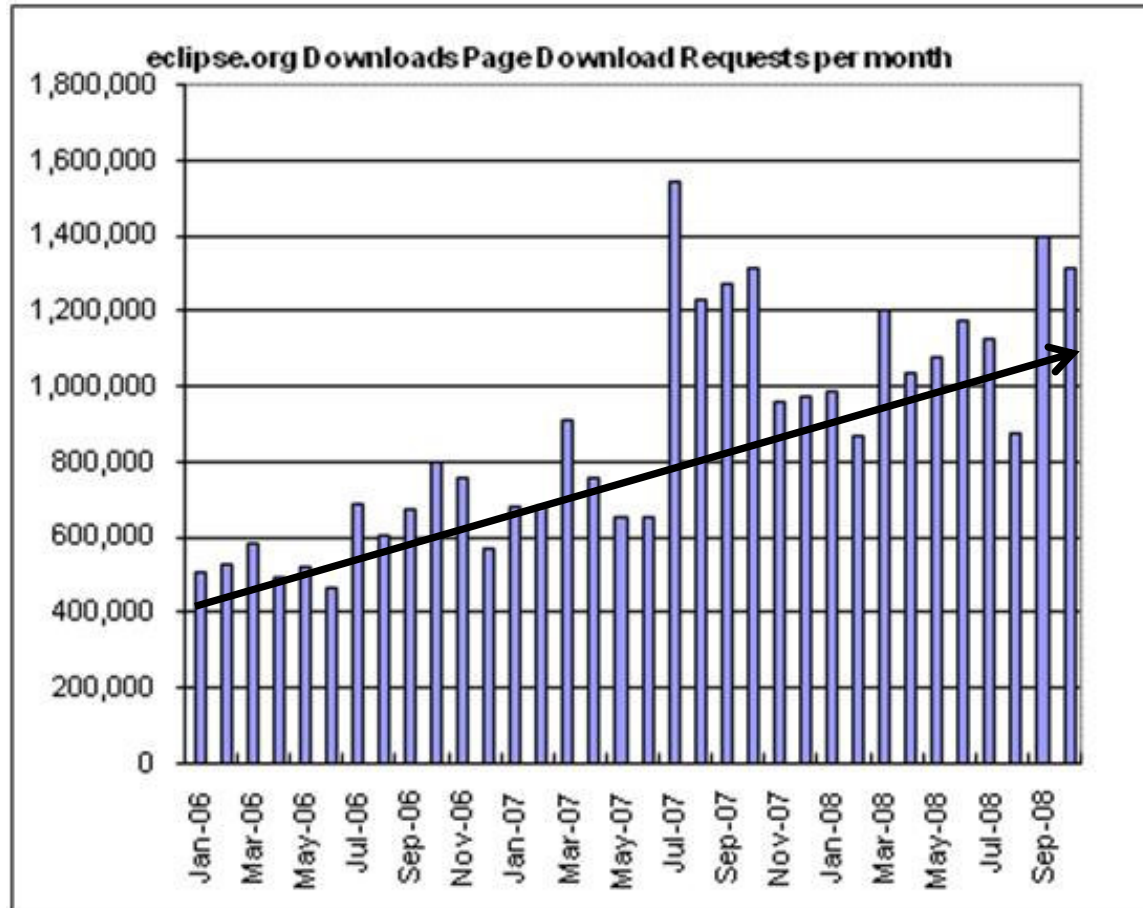

Download Stats

Download Stats

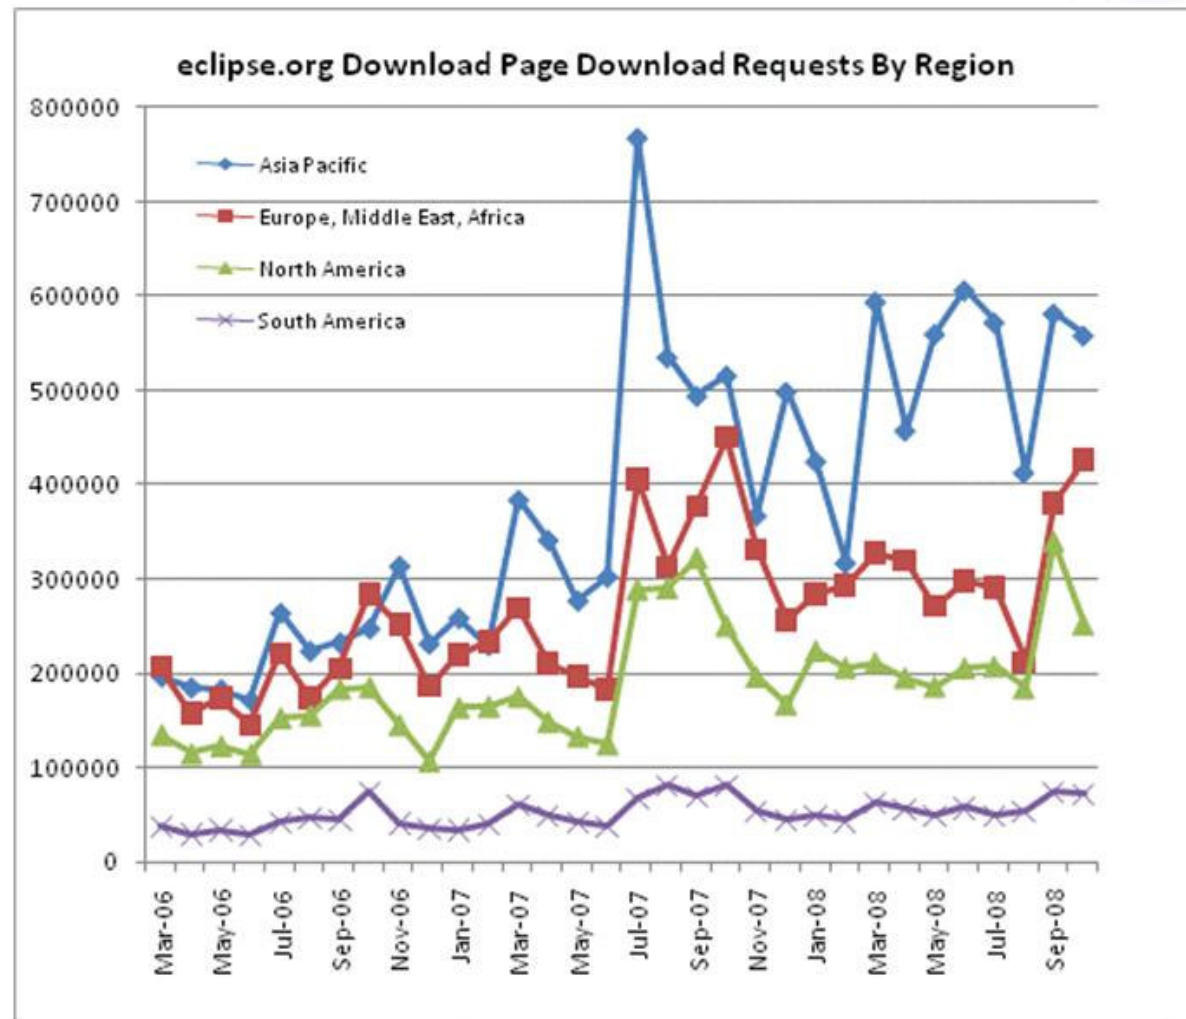

- Steady YoY Growth
- People seemed to understand the Packages this year (fewer multiple downloads)

Download Stats

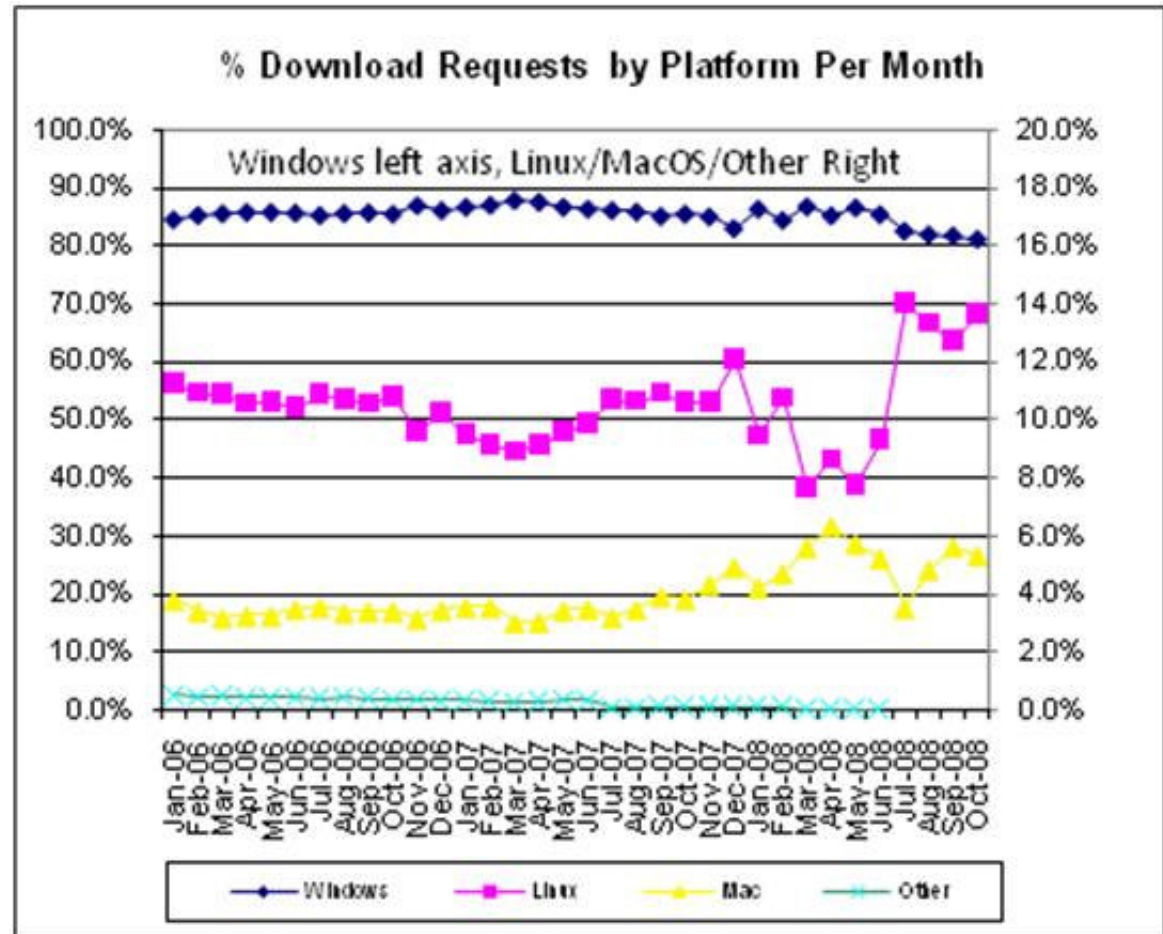

- Consistent ratios between regions.

Download Stats

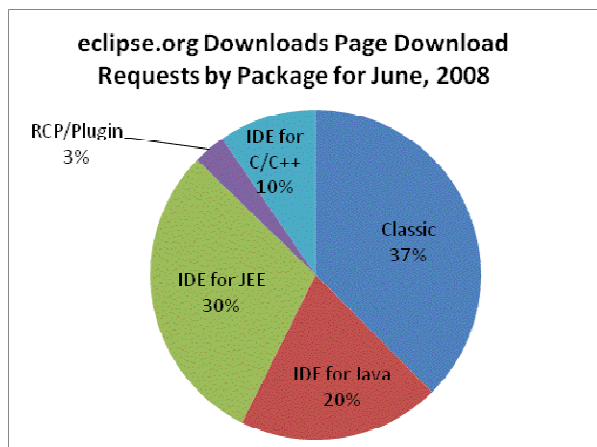

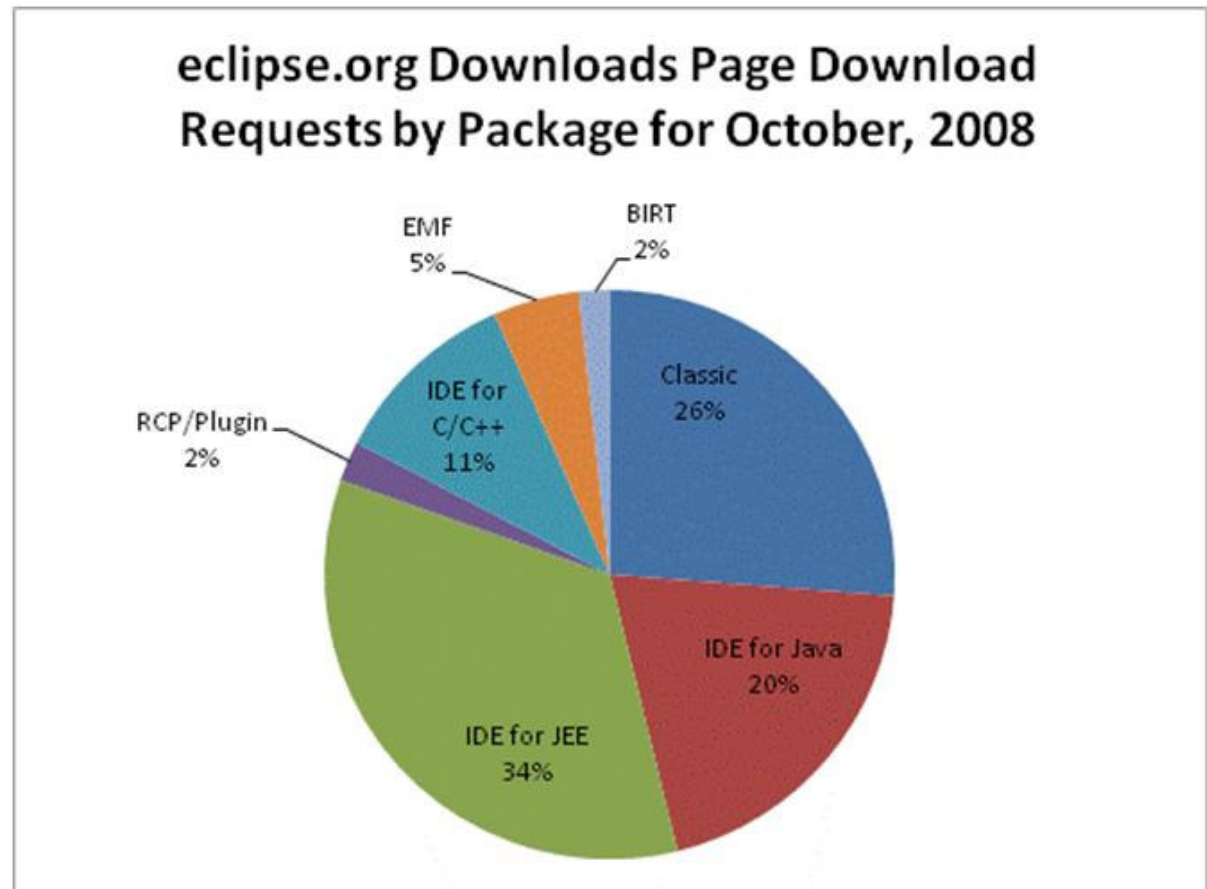

- Slight downward trend appearing in Windows downloads versus Linux/Mac
- Windows at 81%. Will we see it drop below 80%?
- Linux numbers vary wildly depending on distros and Linux OS releases

Download Stats

- Breakdown of Packages appearing on main downloads page.
- Increasing interest in Packages.

Financial Outlook

\$ millions	2005 (audited)	2006 (audited)	2007 (audited)	2008 (budget)
Income	\$3.9	\$5.5	\$5.6	\$5.7
Expenses	\$3.4	\$5.4	\$5.7	\$5.9
Net	\$0.5	\$0.1	\$(0.1)	\$(0.2)

Note: The budget numbers include revenue and expense for co-operative marketing programs, EclipseCon, and the European conferences.

Q3 Activities

- Eclipse Summit Europe Preparations
- EclipseCon Preparations
- Industry Working Groups

Eclipse Summit Europe

- Nov. 19 – 20th in Ludwigsburg
- Expect ~400 attendees
- 30+ sponsors

- European Members Meeting on Nov. 17th
- Marketing Symposium on Nov. 18th

EclipseCon 2009

- March 23rd – 26th in Santa Clara
- Call for papers is open!!

<http://www.eclipsecon.org/2009/submissions>

- A dozen sponsors already confirmed including: BLU AGE, IBM, Instantiations, Innovations Software, Genuitec

<http://www.eclipsecon.org/2009/sponsorship>

eclipseCON™ 2009

March 23rd - 26th
Santa Clara, California

Industry Working Groups

How Corporations will Participate in Eclipse

- At EclipseCon 2008 the concept of Enterprise Membership was introduced.
- Enterprise members participate in two ways:
 - Consumers - Made strategic investment in using Eclipse
 - More pluggable software
 - Closer Alignment with Community
 - *IP Data*
 - Collaborate – Use Open Source to drive efficiencies
 - Open Development Process
 - Architecture of Participation
 - Open Governance
 - *IP Policy*

Making This Happen

- New Corporate Membership launched in Q2/Q3

Ongoing

- Vertical Oriented Projects
 - OMFP, OSEE,

Ongoing

- Industry Working Groups

Motivation for Industry Working Groups

- Grow our membership
- Make Eclipse participation appealing to enterprises and industry verticals
- Concrete implementation of how to create innovation networks and ecosystems at Eclipse
- Provide a framework to attract new consortia to the Eclipse ecosystem

Industry Working Groups

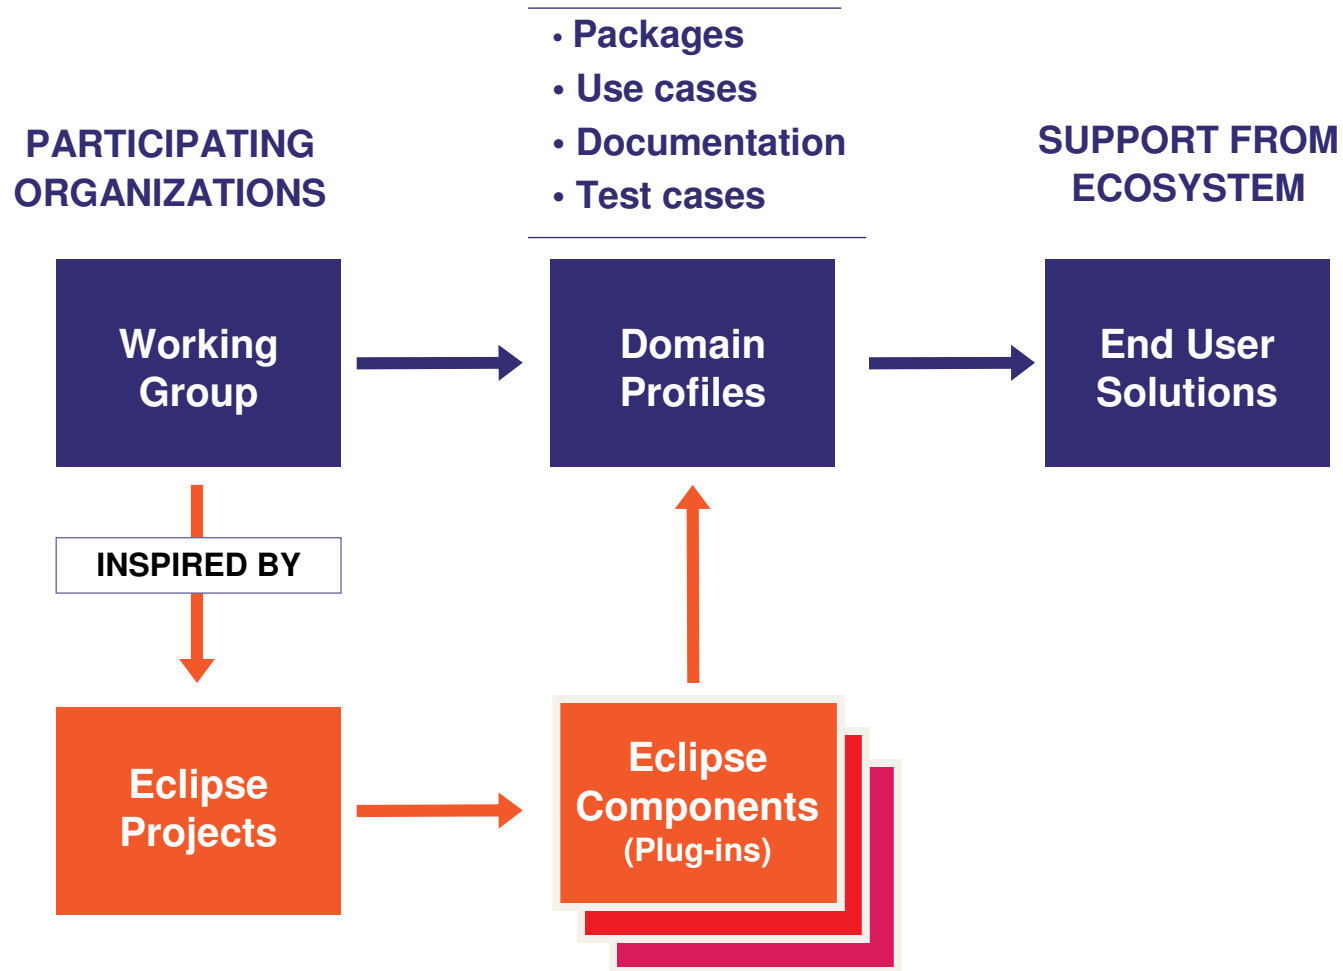

- Industry Working Groups (IWG) allow organizations to collaborate and innovate on the creation of technology, specifications and best practices for a specific industry or market.
- Industry WG provide:
 - The legal agreements to share intellectual property rights.
 - The ability to pool resources to create new technology and standards.
 - IT infrastructure to facilitate collaboration between a distributed team.
 - A governance model and process to ensure a level playing field
 - A technology platform

What can be accomplished in an IWG

- IWG typically focus on solving a problem that is shared in a specific industry
- IWG can:
 - Create packages of Eclipse projects tailored to meet the needs of a specific industry
 - Define recommended specifications to be implemented by an Eclipse project(s)
 - Document requirements that will be used as input into an Eclipse project
 - Write best practices documentation
 - Implement End to End use cases and testing
 - Execute marketing programs to create awareness for the WG offering

Industry Working Group Membership & Governance

- Two levels of participation in an industry working group
 - Steering Committee
 - Working Group Participant

- IWG Steering Committee
 - Writing the scope for the industry working group
 - Set objectives, strategies, policies and plans
 - Determine the guidelines for member participation in the industry working group.
 - Determine what features/components are part of the industry working group
 - Determines resource commitments for all industry working group participants that will cover external resources (development, marketing programs, etc.)

- IWG Steering Committee Obligations
 - Steering Committee Member must be a strategic or enterprise member of the Eclipse Foundation
 - Steering Committee Member will be expected to commit additional resources to participate in the WG activities; this will be defined by the steering committee.

- IWG Participants
 - All participants must be members of the Eclipse Foundation
 - Participate in the IWG meetings; have access to mailing lists, IWG wikis and other assets.

Starting an Industry Working Group

1. Identify 2-3 organizations that will form the initial Steering Committee.
 - Steering Committee drafts Statement of Intent (SOI) for the IWG.
 - Include proposal for chairperson(s) of the steering committee
 - Scope needs to include a statement of intent describing what the WG hopes to accomplish in the next 12-18 months
2. Draft Charter is sent to Eclipse membership for review and feedback
 - also allow for other participants from the Eclipse membership
3. Charter approved for the Eclipse Foundation Executive Director
4. Eclipse Foundation assigns a staff member to act as a primary contact for the IWG
5. Eclipse Foundation turns on the IT infrastructure for the IWG

Mobile Industry Working Group

- Draft charter has been proposed by Motorola and Nokia
 - <http://www.eclipse.org/org/industry-workgroups/mobilewg.php>
- Purpose is to define and implement a Mobile Application Development Kit (MADK)
- Interested members are invited to join
 - Send e-mail to mobile-iwg@eclipse.org or contact Ian Skerrett (ian@eclipse.org)

Q4 Activities

- Eclipse Summit Europe
- EclipseCon 2009 Planning
- Industry Outreach Activities
 - Automotive and Banking

Project Update

Bjorn Freeman-Benson
October 24, 2008

Project Changes

- e4 – Creation Review successful
- GEF3D – created

- Faceted Project Framework – proposed
- Java 2 CSharp Translator – proposed
- MST – proposed
- SLDT – proposed
- SWTBot – proposed
- UFacekit – proposed

- ACTF – 0.5 released
- DSDP TmL – 0.1 released
- Embedded Rich Client Platform – 1.2 released
- Mobile Tools for Java – 0.9 released
- PDE Declarative Service Tooling – graduated
- Photran – Moved to PTP
- The Eclipse Process Framework Project – 1.5 released
- Tigerstripe – 0.4 released
- Webtools XSL Tools Component – Pre-1.0 released

- Dash - Eclipse Monkey – archived
- MDT EODM – archived
- MDT OCL Tools – archived
- Model Driven Development Integration – archived

Roadmap Process

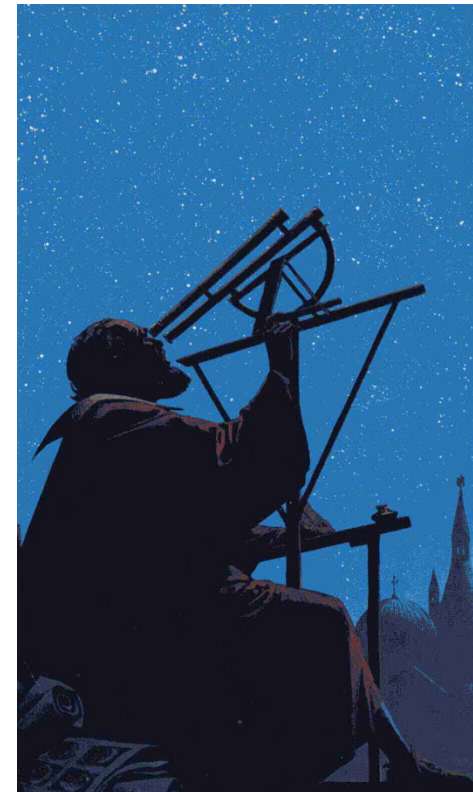

- Project Plans from projects, were due September 30th
 - 30 of 110 projects have valid XML-format plans
- Next step: PMCs to review plans, due October 31st
- Themes & Priorities
 - Platform Support
 - Rich Client Platform
 - Rich Internet Applications
 - Embedded Device Software
 - Ease of Use
 - Technology Trends
 - Scaling Up
 - Enterprise Ready
 - Design for Extensibility
 - Consistent Multi Programming Language Support

Galileo

- First big planning meeting is October 27th (in the future as I write these slides, in the past as you read them).
- Too early to say much except that we plan to have yet another great simultaneous release of major Eclipse projects at the end of June 2009.
